6) Project summary / abstract <i>Résumé du projet</i>	<p>The aim of the project is to increase awareness of the palliative care needs of people with neurological disease – primarily, but not exclusively, amyotrophic lateral sclerosis (motor neurone disease), multiple sclerosis, Huntington's disease and Parkinson's Disease. This will be increasingly important with the ageing population in Europe as increasingly people will have neurological disease, as their main problem or as a co-morbidity.</p> <p>The project will aim to develop guidelines to improve the care of people with neurological disease, by increasing awareness of problems and issues experienced by this population both within palliative care and neurology. This will help in the collaborative approach to holistic care – involving both neurological and palliative care services.</p> <p>The development of a core curriculum for all professionals, in both neurological services and palliative care services, will allow the development of greater awareness and more effective management of this patient group, so that the quality of life of patients and families can be improved.</p>
7) Other Institutions proposed for collaboration <i>Eventuelles autres institutions proposées pour une collaboration</i>	<p>European Federation of Neurological Societies – there will be collaboration on the development of guidelines. In particular the Scientific Committee.</p> <p>World Federation of Neurology – there will be collaboration on the development of both guidelines and core curriculum</p>
