**IN ORDER TO REGISTER FOR THE WORKSHOP, PLEASE COMPLETE AND
RETURN THE ATTACHED CARD TO THE CEPHALON EXHIBITION STAND.**

APPROACHES TO THE MANAGEMENT OF BREAKTHROUGH PAIN - AN INTERACTIVE CASE STUDY WORKSHOP

Through the use of case studies, this workshop aims to generate informal interactive group discussions on the appropriate management of breakthrough pain (BTP) in cancer patients.

Although many people with chronic cancer-related pain experience the intermittent yet debilitating flares that characterise BTP, the condition remains underdiagnosed and frequently inappropriately managed.

The workshop introduces four case studies with the goal - through interactive discussion - of identifying the most appropriate treatment options.

As the workshop is limited to 50 attendees, please complete the attached reply card as soon as you can in order to register your interest in participation.

Title	Professor	Mrs/s	Dr	Other
Name				
Work Address				
Telephone				
Email				
Primary Speciality				
Secondary Speciality				
What % of your patients do you consider may experience "breakthrough pain"?	≤25%			
	51 - 75%			
Which issues in pain management give you most cause for concern? (Please rank the following)	Time to onset of analgesia			Patient sedation
	Convenience to patient			Cost of therapy
